

Well Blocks & Nozzles

A wide range of shapes for use in ladles of all capacities are available. The use of high purity, synthetically produced, magnetted raw materials along with in-house developed recipes allows the production of shapes, having excellent resistance to erosion and metal attack.

Wellblocks and Purgeblocks

These are available in Alumina and Magnesia Spinel Grades dependant upon performance requirements and are used in steel plants throughout Europe.

Upper and Lower Nozzles

These are available in 97% + Alumina grades and Alumina / Magnesia Spinel Grades.
